

INDEX

- Age structure, lizard population, 83
Agropyron spicatum,
 competitive relationships with *Bromus tectorum*, 89-111
 root and stem growth, 102-103
 taxonomy and life history, 92-93
 Amphipods, sandy beach, niche diversity, 173-200
- Blue-gray gnatcatcher,
 diet, 331-343, 349
 habitat requirements, 321-327
 niche, 317-350
- Boreal spruce-fir forests, N. Amer.,
 Analysis of vascular flora, 229-253
- Bromus tectorum*,
 competitive relationships with *Agropyron spicatum*, 89-111
 root and stem growth, 102-103
 taxonomy and life history, 93-94
- Brooks, G. R., article, 71-87
- Carbon dioxide, exchange capacity, 11-14
- Coche, André G., article, 201-228
- Cole, N. H. Ayodele, article, 1-24
- Communities, salt marsh, 299-308
 mangrove, 312
 saline flats, 312
- Competition, between *Agropyron spicatum* and *Bromus tectorum*, 89-111
 field competition, 94-97
 germination and growth, 99-101
 root growth, 102
 soil moisture relationships, 103-106
 stem growth, 103
- Crocker, Robert A., article, 173-200
- Distribution patterns, *Eriogonum*, 2-6
- Ecological life histories, *Eriogonum*, 7-11
- Ecosystem, *Lespedeza*-arthropod, 255-272
- Egypt, salt marsh, 297-315
- Energy flow,
 in arthropods, 263, 238
 in *Lespedeza*, 259, 270
- Eriogonum*, physiological ecology of, 1-24
 drought resistance, 19
 ecotypic variation, 21-22
 environments and distribution patterns, 2
 ecological life history, 7-11
 germination, 7
 photosynthesis, 14
- seedling growth, 8
 shoot growth, 9
 water relations, 15-19
- Fish population,
 growth, 207, 218
 mortality, 207
 production, 208, 222
- Flora, vascular, boreal spruce-fir forest, 229-253
- Food,
 amphipods, 185
 blue-gray gnatcatcher, 349
 steelhead trout, 215
- Gamma radiation, chronic, effects
 on forest structure and diversity, 53-69
 diversity and abundance, 65
 effects on crowns, 61
 production of zonation, 56-59
 tree survival, 60
- Germination, *Eriogonum*, 7
- Growth, *Eriogonum*,
 seedlings, 8
 shoots, 9
- Growth of grasses, roots, stems,
 seedlings, 102-105
- Harris, Grant A., article, 89-111
- Janssen, C. R., article, 145-172
- Kassas, M., article, 297-316
- LaRoi, George H., article, 229-253
- Lespedeza cuneata*, energy flow, 255-272
- Light,
 role of peritoneum, 277, 293
 transmission through body walls, 273-296
- Limnology of freshwater pond, 202-205
- Littoral salt marsh, Egypt, 297-315
- Lygosoma laterale*, population ecology, 71-87
 activity, 84-85
 age structure, 83
 growth, 77
 population density, 80
 reproduction, 78-79
 spatial distribution, 73-76
- Mangrove, Red Sea, 312
- Mathematical models, predation, 138
- Menhinick, Edward F., article, 255-272
- Niche, diversity, 177-198
- Oak-pine forest, Long Island, 53-69
 radiation effects on structure, 64
 species diversity, 59
 structure, 56
 zonation after irradiation, 59
- Oxygen consumption, arthropods, 258, 270
- Paramecium*, population, 113-144
- Population dynamics,
 amphipods, intertidal, 177-184
 ground skink, 71-87
 steelhead trout, 205-209
- Population ecology,
 amphipods, 173
 arthropods, 255-272
 ground skink, 71
 protozoa, 113-144
 steelhead trout, 201-228
- Pollen diagram, postglacial, N.W. Minnesota, 145-172
- Pollen indicators and surface samples, for pollen diagram interpretation, 145-172
- Pollen rain, local, extralocal, and regional, 163
- Porter, Warren P., article, 273-296
- Predation,
 in protozoan populations, 125-138
 review of, 114-124
- Production,
 of arthropods, 257, 261
 of *Lespedeza*, 259
 of steelhead trout, 201-228
- Rebuck, A. L., article, 53-69
- Red Sea, salt marsh, 297-315
 communities, 299-308
 ecological relationships, 311
 geographical relationships, 313
 structure, 309
- Relative turgidity and drought resistance, 19
- Reproductive rate,
 amphipods, intertidal, 180
 lizard, *Lygosoma*, 79
 protozoa, 133
- Reptiles, desert, solar radiation through body walls, 273-296
- Root growth, 102-105
- Root, Richard B., article, 317-350
- Saline flats, Red Sea, 312
- Salt, George W., article, 113-144
- Salt marsh, Egypt, 297-315
- Seedling growth, 102-105
- Soil moisture and competition, 103-106
- Solar radiation,
 insects, 288

through body walls, reptiles, 273-296	America, 229-253	Sympatric species, amphipods, 173-200
vertebrates, 286-287	species diversity, 234	
Species-area relationships, 264	stratification, 231	Taiga, North America, its vascular flora, 229-253
species-number, 265	Steelhead trout, 201-228	Woodwell, G. M., article, 53-69
Species diversity, spruce-fir forest, 234	Stem growth, 102-105	Woodruffia, population, 113-144
Spruce-fir forest, boreal, North	Stevens Pond: its palynology, 145-172	Zahran, M. A., article, 297-316
	Stratification, spruce-fir forest, 231
